

Q 210BG/Q 210DG series

Applications:

Q 210BG/Q 210DG series pressure gauges are for light industrial applications requiring damping. Furthermore, this type is only suitable for gases and liquids that do not attack the brass measuring system.

Specification:

Dial size: 63mm

Case: 304 stainless steel

Ring: Crimped 304 stainless steel

Window: polycarbonate

Tube: Copper alloy

Movement: Brass

Connection: 1/4" BSP brass

Mount: Q 210BG: bottom connection

Q 210DG: back connection

Accuracy: 1.6% according to EN 837-1

Fill liquid: Glycerin or Silicone oil

Pressure ranges: -1-0, 0-1, 0-1.6, 0-2.5, 0-4, 0-6, 0-10, 0-16, 0-25, 0-40, 0-60, 0-100, 0-160, 0-250, 0-400 Bar/Kpa or Bar/Mpa
